Data for 2011 and 2012 are considered provisional and may change after yearly review of data. YTD: January 1st, 2012 through March 31, 2012

¥ Includes *Anaplasma phagocytophilum*, and all cases prior to 2008 reported as human granulocytic ehrlichiosis (*Ehrlichia phagocytophila*)

* Includes *Ehrlichia chaffeensis*, *Ehrlichia ewingii*, and undetermined *Ehrlichia/Anaplasma* species

¶ Includes O157:H7

§ Between August 1997 and December 2007, only cases in persons 5 years of age and younger are reported. All ages are reported for years outside this timeframe.

£ Lyme disease cases prior to 2008 include only confirmed cases. Counts 2008 and later include cases that meet either the confirmed or probable CDC case definitions.

+ One case of human rabies reported in 1996

‡ Includes all stages of Syphilis infection

Note: All the data in this report are based upon information provided to the New Hampshire Department of Health and Human Services under specific legislative authority. The numbers reported may represent an underestimate of the true absolute number and incidence rate of cases in the state. Any release of personal identifying information is conditioned upon such information remaining confidential. The unauthorized disclosure of any confidential medical or scientific data is a misdemeanor under New Hampshire law. The department is not responsible for any duplication or misrepresentation of surveillance data released in this report. Case counts by year are based on morbidity date, which is the date closest to onset of illness and may represent date of onset, date of diagnosis, or date of report, whichever is earliest. Case counts may not exactly match data published yearly by the Centers for Disease Control and Prevention. Data are complete as of April 11, 2012. Data prepared by Dianne Donovan, BSc, 603-271-5927, ddonovan@dhhs.state.nh.us
